

traffic engineer / transport planner; senior traffic engineer / transport planner.

We are seeking a motivated mid-level to senior traffic engineer or transport planner with at least 2 years of experience to join our team in North Sydney. This is a fantastic full-time opportunity to use and increase your traffic and transport consultancy knowledge within a supportive and friendly environment.

Our [website](#) provides details on our services, experience and team.

about us

We value our staff and reward them appropriately with a highly attractive salary package and a range of benefits. Opportunities for rapid career growth for the right candidate.

We have a strong commitment to the well-being of our team and strive to engage with everyone in the organisation. Examples of our efforts in these areas include our health and wellbeing policy, various social activities, and professional development opportunities.

the role

You will be joining our other consultants who are comprised of traffic engineers, civil engineers and transport planners. You will be supporting the Senior team in the delivery of high-quality advice to a consolidated and blue-chip client base. Your tasks will include:

- Preparation of Transport Impact Assessments, Travel Plans, Masterplanning Assessments and bespoke documents.
- Input into place-making, concept development, and feasibility studies.
- Opportunity to lead small and medium sized projects
- Providing technical support and task management for traffic, transportation and placemaking projects locally, nationally and internationally.
- Operational analysis and modelling of intersections and road networks,
- Bicycle and pedestrian facility review and design,
- Technical writing and report presentation.

We have a track record of high client satisfaction levels, and your role requires excellent customer service, ensuring positive client feedback.

required skills

- A Bachelor's or Master's Degree in Civil Engineering or related field, with a focus on Traffic and Transport Planning.
- At least 2 years of work experience within the fields of traffic engineering and transport planning, including the performance of field work such as site inventories and/or traffic data collection.
- Excellent interpersonal, analytical and communication skills.

preferred characteristics and skills

- Experience with site trip generation, operational analysis of intersections and roadways, crash and safety analyses, signal design, and/or signing layout and design.
- Experience in analysis and report preparation.
- Proficient in MS Word, Excel, and PowerPoint.
- Intermediate to advanced AutoCAD skills.

Please send us your resume and a brief cover letter demonstrating your interest in the position to info@ptcconsultants.co.

Candidates must have the right to live and work in Australia to be considered for this role.
