

Senior Civil Engineer

About us

Our core proposition at **ptc.** is to assist clients with the movement of people and vehicles around our cities/places for public authorities or private clients. We also proactively manage a variety of civil design/engineering related projects for industry and infrastructure (hospitals, transport and commercial enterprise). Our website (ptcconsultants.co) provides extensive details on our services, experience and team.

We offer a flexible work environment and have a strong commitment to the wellbeing of our team with continued professional development and social activities. We value our staff and reward them appropriately with a highly attractive salary package and a range of benefits.

The role

We seek a Senior level Civil Design Engineer to support our growing team.

This is a fantastic full-time opportunity to use your civil design and engineering knowledge and your vision of a changing environment within a supportive and friendly environment.

You will be joining in the management of a large variety of projects and the junior team comprising civil engineers, traffic engineers, parking consultants, CAD drafters and data analysts.

You will be directly responsible for delivery of high quality advice to a blue-chip client base including the likes of Mirvac, Toga, Dexus, Stockland, NSW Health Infrastructure, TfNSW, and several Councils (just to name a few).

We have a track record of high client satisfaction levels and your role requires the provision of excellent customer service ensuring a positive client experience.

Reporting to the **Civil Team Leader and Project Director**, this is an opportunity to demonstrate your can-do attitude, who is consultative, able to prioritise their work and get things done.

Duties include

- Technical guidance and consulting on client facing projects and a hands-on role in supporting business operations and overall project delivery;
- High quality proposals and pursuits, oversight of technical specifications and scopes of work – for tender phase, design phase and construction phase;
- Periodic site inspections of work under construction to verify that as-built work conforms to the design drawings and technical needs;
- Management of concurrent projects to time, budget and quality with minimal supervision (incl. design reviews, flood assessments, change management, request for information, validation and verification);
- Excellent written and oral communication skills, stakeholder management and production of written reports to a high standard;
- Contribution to the traffic and parking team by actively assisting colleagues to improve client feedback results, enhance satisfaction and exceed client expectations;
- Development of team capability and mentoring of junior team members.

Required skills

- 7+ years' experience on Australian civil engineering projects
- Experience in a Senior Civil Engineer role or similar, with project management skills
- Experience in the design of earthworks, roads, stormwater and sewer services
- Possess a strong working knowledge of 12D or Civil 3D
- Possess an excellent knowledge of MUSIC, HECRAS/DRAINS (or similar)
- Excellent verbal and written communication skills
- Bachelor of Engineering (Civil) – suitable for membership of Engineers Australia..
